

TREADMILL ECORUNⁱ

PLUG AND RUN !

THE MACHINE

The DKN EcoRun is a Plug and Run treadmill, featuring a pre-assembled machine: compact, easy to handle and store away.

This entry-level machine is conceived for those users who are looking for a treadmill which will offer the comfort and trustability of a fully equipped machine, but who don't need all features of a semi-professional equipped model.

The 1.75 Hp motor allows the user to choose any speed between 0.8 up to 16 Km/h. And the incline motor allows automatic incline settings up to 12 levels. The EcoRun: a non compromise value for money deal.

IMPACT REDUCTION

A 20 mm running deck, mounted on 6 shock absorbing supports, and equipped with a 2 mm running belt assure a gentle impact absorption, making the EcoRun a perfect match for the beginner, both for rehab training or for motion training, while the integrated hydraulic shock-absorbing system enhances a better, smoother and quieter performance.

TECHNICAL SPECS

- > Weight: 63 kg
- > Dimensions (L x W x H) : 620x 710 x 1380 mm
- > Dimensions Folded (L x W x H) : 940x 710 x 1470 mm
